

Dear Colleagues:

It is my great pleasure to congratulate you all with this great anniversary. I am extremely thankful to my mentor Valter Alekseevich, and all the colleagues from Theorotdel for education help and encouragement I received from them during my years at the Institute. Whatever I managed to achieve in the US grows from my experience at IPH, and I will always remember it. Congratulations, again, and lots of success in your work.

Sincerely,

Lev Deych

Professor of Physics

Queens College of City University of New York

New York, USA.
